- A startup supporting fund established by the Kyoto City Government and local banks
- the Kyoto City Venture Companies Connoisseur Committee which members are indigenous ex-startups designates eligible startups

“There’s probably no economic center in the world that is as under-utilized as a platform for entrepreneurship as Osaka”

A View on Kansai’s Startup Ecosystem

Allen Miner Sun Bridge Corporation
Group Chairman and CEO

Forbes Aug 2, 2018, 04:52pm

Allen Miner, CEO of Sunbridge Group, says Osaka represents an enormous untapped market for startup companies

Located at the heart of Japan’s second-largest metropolitan area, Osaka is emerging as a startup hotspot based on dynamic government support programs. The city and prefecture has given birth to long-established Japanese brands such as Panasonic, Sharp, Suntory and Nissin Food Products, as well as more recently founded high-tech firms including Sakura Internet and Capcom. There are also an estimated 1,000 early-stage seed startups in Osaka.

“There’s probably no economic center in the world that is as under-utilized as a platform for entrepreneurship as Osaka—there’s a huge local market and talent pool and a huge potential for consumers,” says Allen Miner, former head of Oracle Japan and CEO of Sunbridge Group, a venture capital organization based in Tokyo and Silicon Valley with about \$2 million invested in the Osaka region. “As of a year ago, all our seed investments were in Osaka because there’s not enough funding there to meet the underlying potential.”

Osaka is an important case study of how the public and private sectors are working together to bring Japanese innovation to greater heights on the global stage.

X(cross) Port

The “Future Lab,” a problem-solving Open innovation platform

A Companies wants to solve problems/develop new ideas through open innovation can be a leader of the XPort, disclose themes and start its own project.

Companies including startups and researchers interested in these themes can participate those projects as members of the XPort.

X Port is located in the UMEDA campus of the Osaka Institute of Technology.

Appendix III

Overview of Kansai Region and Its Economy

- Kansai is an area located in the center of Japan with population of approximately 21.66 million. Its GRP is approximately \$823.8 billion equivalent to GDP of Netherlands (ranked 17th in the world).
- Kansai has well known three thriving cities, Osaka, Kyoto, and Kobe. Those major cities are located within Silicon Valley size of area. Kyoto and Kobe are 30-minute ride of rapid train services from Osaka's city center.
